Ongoing Planning Work Group Action Items

- Still waiting for ENF LiDAR derived products from UW Forest Resiliency Lab.
- ACCG 2022 Project Planning, Development & Implementation Priorities Responsibilities:

Amador Calaveras Consensus Group (ACCG)

Planning Work Group [Zoom] Meeting, Wed., 9/28/2022, 9:00am-12:00pm, megan.layhee1@gmail.com

- Continue moving forward with landscape-scale planning, while also identifying and securing funding for shovel-ready projects:
 - Continuing to support and engage with UMRWA's Forest Projects Plan Phase 1-2.
 - Engaging with the USFS on their 2022 program of work.
 - Continuing to support large-landscape analyses to help strategically accelerate implementation.
 - Support and assist the USFS find efficient and effective ways to compete for funds. And as part of that, support the USFS obtaining increased resources and building workforces to support surface and ladder fuels implementation.
- Support biomass utilization infrastructure development projects.
- Focus on projects and activities, including activities that increase forest health, and meadow and wetland restoration, that promote water retention on the landscape to prepare for future droughts.
- ACCG 2022 Priorities Responsibility - Continue to support implementation of ACCG's Pyrosilviculture Shared Vision
 - Continue discussions on defining broad plan for implementing pyrosilviculture shared vision. Start with the five steps Greg Suba proposed (in email to the Pyro Ad Hoc group, 10/21/2021):
 - Understand the landscape and subdivide it into strategically derived fire management areas (e.g., PODs, boxes, etc.)
 - Agree on strategy for where, when, and how best to manage for fire within every containment area / box, and between containment areas / boxes.
 - Identify which boxes are in most urgent need of work in order to apply, manage, and/or suppress fire effectively and as safely as possible.
 - Seek and obtain funding for that work.
 - Implement 1st-entry fire and/or thinning followed by fire as planned.
