Provide any suggestions for 2023 general meeting topics.

6 responses

management activities that increase water yield, such as prescribed fire, beavers, cover crops, etc.

1) update on existing and emerging biomass/wood utilization within ACCG focus area (Phoenix Energy, Ampine, Alpine Co.'s ban on biomass facilities), 2) update from BLM on management of forested lands within ACCG focus area, 3) update from SPI on the status of their fuel break networks, 4) presentation from SBC on the CERF program and opportunities for ACCG collaboration, 5) developing rx based on residual basal area vs dbh, 6) update from Mother Lode PBA.

I would like to see more content on the communities and the benefit to communities.

I'd like to learn about the effects of recent wildfires in experimental forests and the implications for treatments.

Discussion of role of ACCG in the future.

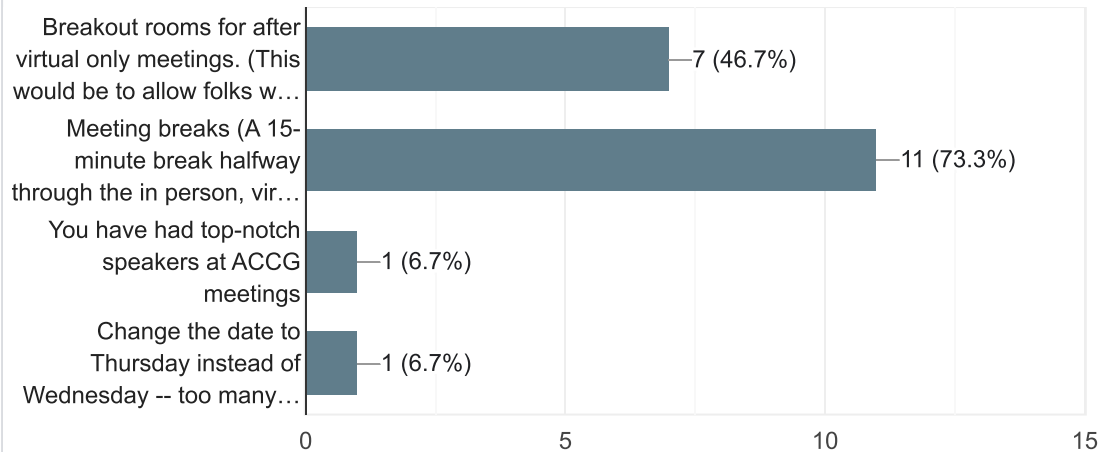

cultural burning practices vs. prescribed fire, update on other collaboratives in the Sierra Nevada

### Additional general meeting suggestions.

While there is always possible topics to discuss, shortening both the general and PWG meetings to 2 hours instead of 3 hours would likely increase participation and not lose attendee's interests.

Support partner's efforts to prevent megawildfire damage to communities, the Mokelumne Watershed and Domestic Water Supply areas.

More discussions about priorities of group and projects that group wants to accomplish.
